How to use the public transport in Riga

Schemes of the public transport routes could be found on the link below:

In principle you need only the trolley-buses scheme.

In order to use a public transport in Riga you should have an E-ticket. E-ticket is a universal electronic ticket enabling the use of the most up-to-date and convenient means of payment for public transport services. The example of yellow E-ticket (the picture could be different) could be seen below.

You could purchase E-tickets:
- **In ticket vending machines** (price depends from ticket type)
- In “NARVESEN” shop (price depends from ticket type)

- In public transport from the driver (2.00 EUR)

When entering public transport – bus, trolley-bus or tram, a passenger has to apply a yellow or blue E-ticket at the electronic validator. Thus the trip is registered and the passenger has paid for the trip. Picture of the validator could be seen below:

Passengers without a valid or validated ticket are subject to the penalty fare.
